Objective.

To continue to expand my knowledge, achievements, and skillset with all things design, development, marketing, and the fascinating marriage of technology and business.

Experience.

June 2012-Present

Farm Journal Media (Cattle-Exchange.com, Farmjournalmobile.com)

Senior PHP Developer/PHP Technical Lead

As the PHP developer at Farm Journal Media, I was responsible for maintaining and developing an existing ZEND website that handles the buying and selling of cattle throughout the United States. I oversaw and implemented a platform switch to Drupal 7, retaining the old site's functionality and building new and improved features and areas to Cattle-Exchange that provide revenue-generating outlets housed entirely within the confines of the site.

Farmjournalmobile.com provided me the opportunity to project and group-manage a large scale custom - built Mobile Marketing platform for the company. This included working with several third party vendors and API's to finish a build out that utilizes both SMS and MMS marketing in the world of agriculture.

May 2009-June 2012

Weigel Broadcasting (WCIU-The U, MeTV, ThisTV)

Web Developer

My web developer title at Weigel Broadcasting required me to develop new pieces to our ever-growing collection of 100+ websites, troubleshoot existing code, work with over 20 databases, improve overall user experience, and bring creative ideas for web marketing to our table.

October 2005-Present.

Freelance Design/Development

10 years of freelancing both full and part time has provided me invaluable experience, and a client list from around the country:
